CAR WASHING BRUSHES

We invite you to learn about our wide catalog of products including car washing brushes, telescope brushes and wipers with rubber blades.

Excellent performance, great functionality and serious strength - these are advantages of our products. Brushes are made from soft bristle enabling effective and safe car washing without damaging a lacquer. Products are light and solid at the same time. Trust to our know-how and experience.

Washing brushes

Car washing brush STANDARD

This brush is a basic tool for every car owner, who wants to keep his vehicle clean. The product has a special, soft hair, made of PVC, which is resistant to detergents. The hair ends are split, which allows to wash the car efficiently and safely without damaging the layers of paint. The product can be attached to a source of water, e.g. to a garden hose, which makes it easier to wash the car. The water distribution system is safe and prevents sprinkling on hands and clothes. A comfortable handle was cased in two-colour sponge, which facilitates a stable and convenient grip on the brush. Available colours – red, blue, yellow

Index	Lenght (cm)	Fibre	Colors:	Pcs./pallet	Pallet

Car washing brush STANDARD PLUS

This brush is an irreplaceable tool in you garage. It will be perfect for any cleaning tasks – well-profiled brush facilitates removing sand and dirt from the car. The tool is light, handy and comfortable to hold in different positions. The element will not scratch the paint nor it will leave any marks due to the right kind of hair used in the production process. The brush was made of resistant materials. The end of the handle allows for joining the brush directly to a water hose. It will make cleaning much more convenient and you will avoid getting your hand wet and scrubbing the surface. The brush is completely safe and prevents soaking of clothes.

Car washing brush PREMIUM

This product will be perfect for cleaning vehicles, as well as garden equipment, e.g. garden furniture. Soft PBT hair is designed to precisely remove dust from delicate surfaces without scratching it. The dirt comes right off the paint thanks to split hair ends. The material used for manufacturing this product was polypropylene – a material, which is very durable and reliable in all atmospheric conditions. It is possible to connect a water hose to the handle. The brush distributes water evenly, it is comfortable, prevents getting water onto hands and clothes. The comfortable handle is additionally provided with a valve to cut off water supply.

Wipers with rubber blade

Squeegee

The product joins two functions: a sponge covered with a net, which cleans effectively, removes dirt from windows and mirrors, and a rubber puller, which perfectly collects excessive water from washing the car or tiles in the garage, in effect leaving them cleaned and shining. The rubber part precisely fits the surfaces, which makes them dry and clean. The washer with a puller is made of a durable, resistant and delicate material, thus it does not leave scratches. The frame of the washer was made of a durable and resistant polypropylene, thus making the product strong, durable, resistant to corrosion and detergents. A long shaft further facilitates reaching hard to access areas.

ACCESSORIES FOR BUILDING

For our clients we have prepared a wide range of practical products for daily work of companies representing overhaul or finishing industries.

Building containers and mortar buckets are necessary in the garden and on the building site; also most of overhaul works are carried out due to such products. They are great solution to transport sand, soil, bark and to mix cement, adhesives and dry & wet mortars. To assure the products are highly resistant highly elastic plastics were used to produce them. We offer round and rectangular mortar buckets of varied volumes.

Building containers

Round containers

This round caster has a wide range of applications, especially during renovation-construction works. It will also do well in a garden, e.g. to water plants. The round shape of the caster facilitates not only mixing mortar, but also washing the container. casters can have capacity of 40, 45, 60 or 90 litres. On its sides convenient handles were located, which significantly facilitates carrying. The caster is provided with a practical convenience – a pitch to measure the quantity of mortar used.

Index	Capacity (L)	Pcs./pallet	Pallet (cm)
20023	45	240	130x110x240
20047	60	240	130x110x240
20054	90	1140	120x80x235

Square containers

Rectangular construction casters can be used during renovation works, but are also perfect in every workshop or garden. The product is provided with two carrying handles, which are located at the sides of the container to facilitate moving it quickly and conveniently from one place to another. The product is made of a durable and at the same time flexible polymer, thanks to which it is characterised by high resistance to any damage and will serve you for a long time. Its walls are smooth, so it is very easy to remove the residue mortar or other mixtures from it. The casters are available in the following capacities: 40, 60 and 90 litres.

Index	Capacity (L)	Pcs./pallet	Pallet (cm)
20061	40	240	120x80x240
20078	60	240	120x80x240
20085	80	140	120x80x240

Building buckets

Building buckets

A construction bucket is a basic accessory in every house. It facilitates completing everyday cleaning tasks as well as it will be necessary for works in garden or in construction. The bucket is universal and can be used for multiple activities: from preparing various types of cement or plaster mortar, to store materials or work accessories, from fluid and semi-fluid construction chemistry products (glues, lacquers, plasters, paints), to carry soil, garden bark or water for plants. The buckets available in our offer have a comfortable, metal handle. There are buckets of 12 and 20 litres of capacity. They were made very robust.
