ABOUT US

GARDECO has been developing its product lines with passion since the year, 2000. The core business of our company is the export of carefully selected own products and products of the best Polish manufacturers. GARDECO provides B2B services, only. Most of our clients come from the European trade networks and wholesalers.

Thanks to our broad business experience and excellent logistics, GARDECO products are available for purchase in stores and online in most European countries, in Germany, Austria, France, Finland, Sweden, Norway, Denmark, Slovakia, Czech Republic, Lithuania, Latvia, Estonia, Spain, Netherlands, just to name a few.

We encourage you to take a closer look at an extensive list of products presented by GARDECO. The company offers high-quality and innovative items for homes, gardens, workshops, and landscaping.

Excellence in Customer Service is our top priority. GARDECO strives not only to provide the best products at competitive prices, but also offers consulting, best custom solutions, and close cooperation with the clients, for fruitful and long-lasting partnerships.

// GARDENING TOOLS

Our company provides the necessary gardening tools for all seasons and all levels of the gardening experience. GARDECO offers products that keep the gardens growing and looking great, all year round. Our equipment can help mowing the lawns in summer, raking the leaves in autumn, and removing snow in winter. GARDECO gardening products include, among others, the garden baskets, watering cans, snow shovels, and garden trolleys. Our products are designed to work well and make the gardening tasks easier and fun. GARDECO aims at full customer satisfaction with their gardening projects completed while using our tools.

**// GALVANIZED
PRODUCTS**

GARDECO offers metal containers made from high quality galvanized steel and equipped with strong handles. Our galvanized steel buckets can be used in many ways, from transporting liquids or solids, to serving as decorative items for planting or other green arrangements. The buckets are designed for indoor and outdoor use. They can be safely filled with a lot of different goodies, prizes, or just with ice to keep the drinks cold at a garden party. To satisfy various customer tastes, the metal buckets come as plain galvanized steel or are painted. Galvanized steel look offers a rustic feel and a vintage charm. The buckets painted with expressive colors bring spontaneity and freshness. They can greatly enhance the look of any home or garden for that special event.

// BROOMS & BRUSHES

GARDECO brooms and brushes are designed to work well in all weather conditions. No matter if it is dry, wet or even snowy outside, you will surely find a proper broom to use in our range of products. For maximum efficiency and the ease of use, we diversify the thickness, length and structure of the filaments in our brooms and brushes. Some broom filaments have added wires to strengthen their scrubbing effect. Mixing thin and thick fibers allows for scrubbing and sweeping action at the same time. Whenever it is possible, we use recycled materials and return the plastic waste to the production cycle. Being environmentally friendly is of a great importance to GARDECO, therefore we use fibers that are 100% recycled or come from natural and ecofriendly sources like the bassine, tampico, or horsehair. GARDECO brushes are strong, sturdy and durable. Through our production experience, we know what clients want from a great broom or a brush, and we deliver exactly that.

BASSINE

Stiff, thick palm fiber, dark brown in color. It is best used for dry, oily and moist floors. Its coarseness and good water resistance make it ideal to produce the stiff scrubbing and cleaning brushes; best for outdoor use.

TAMPICO

Produced in Mexico from the stalk of the Agave plant. The basic color of tampico fibers is natural white but it can be dyed to any color. Tampico has a high heat resistance. It can be used wet or dry. Tampico is very water absorbent and resilient, as well as hygienic and skin friendly.

UNION

A mixture of two or more materials, usually tampico and bassine, with a medium stiff texture. It is primarily used in household, dish washing and scrubbing brushes.

ARENGA

Robust fiber which is harvested from the Arenga Pinnata Palm, or sugar palm. Its color ranges from dark grey to black. It can be used for dry, oily or moist floors, and is predominantly used in outdoor areas. Arenga does not crush easily and is suitable for garden and street brooms.

HORSEHAIR

Natural fibers from the tail or mane of a horse, dun-colored or black, they can be thin or thick. Horsehair is used primarily for high-quality brooms, shoe and polishing brushes, ecological brushes, sweepers for smooth and dry floors, as well as, dusters brushes to remove fine dust and dirt.

PIG BRISTLE

Soft, highly elastic animal fiber from pig's hair. It is mainly used for ecological brushes, floors, carpets, clothes, bath and painting brushes. The whitening process makes the bristle more hygienic and is mainly used in high-quality ecological brushes for household and body care.

ELASTON / POLYESTER (PET)

Polyester has good heat and moisture resistance. It has excellent sweeping qualities and is resistant to petrol, alcohol, and organic solvents. It is made from recycled granulate; therefore, using polyester contributes to waste recycling. It is best used for coarse and wet dirt, predominantly used in outdoor areas.

When you buy brushes from GARDECO, you support the proper use of the natural resources which are sourced without causing harm to the natural environment. Wooden blocks are responsibly produced and come from well-managed forests.

Whenever possible, we use recyclable materials in our products.

// GARDEN LANDSCAPING

GARDECO offers a range of products for innovative landscaping. Our eco-friendly products are an excellent alternative to concrete and asphalt coatings of driveways and parking spaces. The lawn grid plates can be used to reinforce extensive green areas, driveways, access roads, parking areas, slopes and walkways. Our lawn borders prevent grass overgrowth and separate the lawn from flower beds or vegetable gardens. Drainage channels together with available accessories help to control the water flow along the sidewalks, squares, roads, garages, sports places, etc.

LAWN GRID PLATE

GARDECO lawn grid plate is designed to reinforce the surface in an environmentally friendly manner and does not interfere with the nature and physical features of the terrain. The lawn grid plate is made of durable raw material, resistant to load. Self-locking hooks attached to the sides make the assembly of grates easy and fast. The GARDECO lawn grid plate is an excellent alternative to concrete and asphalt coatings, as being better suited to extensive green areas, driveways, access roads, parking areas, slopes or pavements and is almost invisible after sowing the grass. It is designed to improve natural water drainage and contains UV stabilizer which prevents its degradation by sunlight.

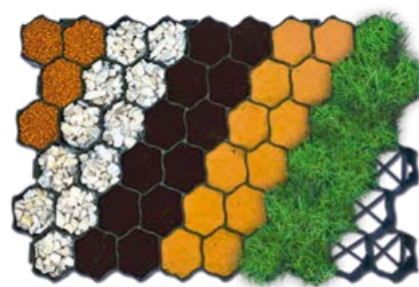

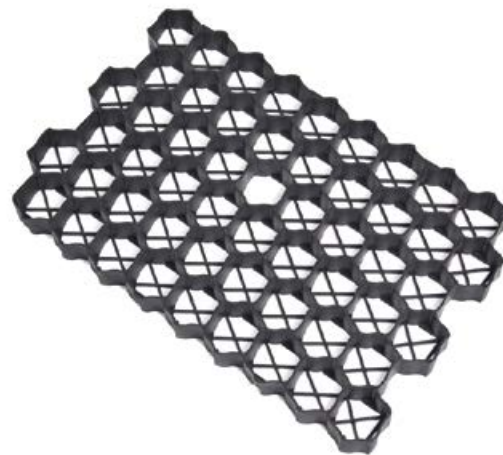

The grid can be supplemented with various materials depending on the application:

- ▶ for garden: grass, sand and gravel
- ▶ for parking: debris, small stones

WE HAVE TWO HEIGHTS OF LAWN GRID PLATES AVAILABLE:

- ▶ 30 mm - perfect for garden paths, patios, driveways or carports
- ▶ 38 mm - recommended for heavy traffic surfaces, excellent alternative to „heavy“ (physically and optically) concrete pavement slabs, or concrete

There are 4.2 lawn grid plate per 1 m². GARDECO lawn grid plates meet the requirements in accordance with PN-EN 124 and PN - EN1433. Products are in load class A15 and B125.

ANTI-SLIP SURFACE

EASY TO INSTALL WITHOUT TOOLS

INTERLOCKING PLASTIC FLOOR TILES

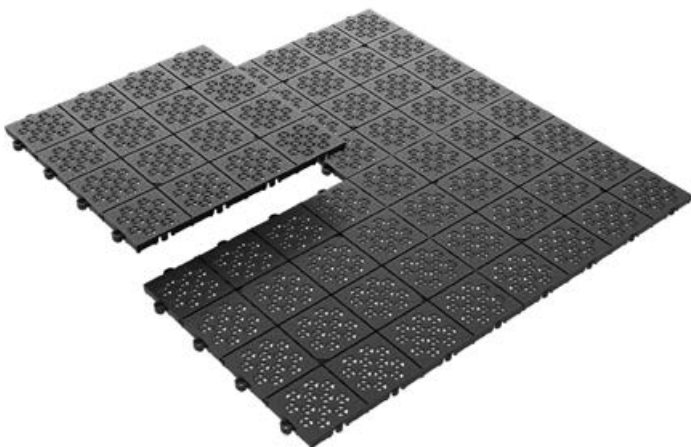

These high-quality plastic floor tiles are manufactured using recycled PP, ensuring durability and sustainability. They are designed to maintain their color over time and feature UV protection, making them resistant to fading, staining, and capable of withstanding temperature changes. Additionally, these tiles are easy to clean and maintain.

Each bundle of interlocking plastic floor tiles contains 11 pieces, covering an area of 1 square meter. Each individual tile measures 300 x 300 mm with a height of 10 mm.

These tiles are ideally suited for various outdoor applications such as balconies, patios, and terraces. They are exceptionally robust, capable of supporting the weight of a car, and as a result suitable also for private garages, storage spaces, and other similar areas. Furthermore, possessing an anti-slip surface, makes them safe to use in wet environments such as bathrooms, poolside areas, saunas, and jacuzzi areas.

Thanks to the convenient click system the assembly is effortless. The tiles can be easily interlocked without the need for tools.

If necessary, the tiles can be customized to fit specific dimensions by cutting them with a folding knife.

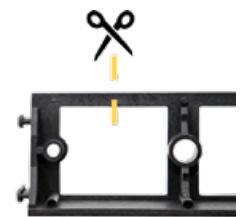

set - 11 pcs. ~ 1 m² ▶

LAWN BORDER

This product is made of plastic Polypropylene. GARDECO offers edging sizes 1000 x 60 x 45 mm and 1000 x 60 x 70. It has holes that allow you to attach it to the ground using plastic anchors included in the set. The anchors are 190 mm long. GARDECO edges perfectly separate the lawn from pavement made of paving stones, lawn grids, avenues lined with stone or surfaces around plants protected with geo-textile fabric and bark chips. They make the garden spaces look neat and elegant.

MULTICOMPOSTERS

The Multi Composter is a spacious standing compost bin, designed to simplify the composting process. It is available in capacities of 480L and 360L. Unlike many other bins, it requires minimal assembly and does not require any tools. Once set up, it can be conveniently placed in a garden or tucked away in a secluded area.

Using the Multi Composter 480L and 360L is simple and intuitive. Simply add your composting materials and let nature take its course. The composting process typically takes anywhere from 1 to 12 months, depending on various environmental factors and the materials you add.

The most important features:

- ▶ Drip irrigation system
- ▶ Padlock hole
- ▶ Solid side latches
- ▶ Irrigation and aeration
- ▶ Strong hatch hinges
- ▶ Comfortable handle
- ▶ Large slide gates with comfortable holders
- ▶ Assembly of ground anchors
- ▶ Self-assembly

DRAINAGE CHANNEL

The GARDECO drainage channel is useful for draining water from sidewalks, squares, roads, garages, sports facilities, etc. It is the ideal option for those who truly value simple, comfortable and sustainable solutions. The linear drainage module consists of a 1000 x 130 x 98 mm channel and a metal grille. Unlike to drainage systems offered by competitors, our system has the capability to both lateral and bottom water removal. The use of polypropylene as a channel material guarantees a high chemical resistance including acids, alkalis, salts and organic solvents. Channel in A15 class for the most-chosen product in our offer.

FOCUS ON SUCCESSFUL PACKAGING OF GARDECO PRODUCTS

Comprehensive logistic solutions have been offered at GARDECO for over 18 years. We make sure that the products delivered to our customers are well secured for transport with appropriate packaging materials. The packaging is properly adapted to the means of transportation and the product type in every shipment.

We pack the products with a great care for the smallest detail, protecting them against harmful effects of external factors, moisture, and pollution. Our goods are packed on pallets, in cardboard or display cases, which attract consumer's attention. An optimal presentation of goods is an important marketing tool which benefits the sellers. We can also assist with the design of private labels and branded displays.

Our specialists are ready to help our clients in choosing the most appropriate solutions and adjusting them to their individual needs.
