

GARDICO®

FOR LANDSCAPING

Gardeco was founded in the year of 2000. It is a private trade company. It is based in Cracow. The founder of the company is Joanna Dobroń. The basic activity of the company is the export of carefully selected products of the best Polish manufacturers. Gardeco provides services only B2B. European trade networks and wholesalers make the majority of Gardeco clients. Thanks to the experience achieved and very good logistics, Gardeco products are available in stationary and Internet stores in whole Europe (Germany, Austria, France, Finland, Sweden, Norway, Denmark, Slovakia, Czech Republic, Lithuania, Latvia, Estonia, Spain, Netherlands and many more). We encourage you to look into our company's wide offer. We are proud to offer high-quality products for house, garden, workshop and landscaping. The goal of the company is thorough and professional customer service by not only providing the best products at competitive prices, but also through consulting, passing on our knowledge, offering the best solutions, partnership and fruitful, long-lasting cooperation.

# LAWN GRID PLATE

## THE OFFER INCLUDES 30 MM AND 38 MM THICKNESSES

---

Our products meet the requirements  
in accordance with  
PN-EN 124 and PN - EN1433.

Product in load class A15 and B125

# Lawn Grid Plate 30 mm

Available colours: ● ●

It is an excellent alternative to "heavy" (physically and optically) concrete pavement slabs, concrete openwork panels, paving stones, asphalt and other types of paved surfaces. The product is nature friendly, water permeable and almost invisible after sowing the grass. Recommended for intense traffic parks. Provides UV stabilization that prevents degradation by sunlight. Our products meet the requirements in accordance with PN-EN 124 and PN - EN1433. Product in load class A15 and B125

# Lawn Grid Plate 38 mm

Available colours: ● ●

The lawn grid plate 38 mm is designed to reinforce the surface in an environmentally friendly manner and does not interfere with the nature and physical features of the terrain. The Gardeco lawn grid plate is made of plastic. Self-locking hooks attached to the sides make the assembly of grates easy and fast. There are 4.2 lawn grid plate per 1 m<sup>2</sup>. The Gardeco lawn grid plate is an excellent alternative to concrete and asphalt coatings, as being better suited to extensive green areas, driveways, access roads, parking areas, slopes and pavements.

# DRAINAGE CHANNEL

**EXTREMELY DURABLE, RESISTANT TO  
MECHANICAL DAMAGE, DOESN'T  
CORRODE AND IS EASY TO ASSEMBLE.**

---

Load class from A15 to C250.  
The offer includes comprehensive  
solutions for construction.

# Metal Channel Drainage

The Gardeco drainage channel is useful for draining water from sidewalks, squares, roads, garages, sports facilities, etc. It is the ideal option for those who truly value simple, comfortable and sustainable solutions. The linear drainage module consists of a 1000 x 130 x 98 mm channel and a metal grille. Unlike to drainage systems offered by competitors, our system has the capability to both lateral and bottom water removal. The use of polypropylene as a channel material guarantees a high chemical resistance including acids, alkalis, salts and organic solvents. Channel in A15 class for the most-chosen product in our offer.

# LAWN BORDER

## THE LAWN EDGE IS INTENDED FOR THE AESTHETIC FINISHING OFF OF VARIOUS TYPES OF SURFACES.

---

The lawn border preventing grass overgrowth and separating the lawn from the rebates or cultivated part of the garden. With the help of Gardeco edges, you can designate and limit any shape of gravel or grit paths, e.g. for pedestrians, bicycles in parks and green areas.

# Lawn Border

The lawn border was made of plastic. It is 1000 mm long and 80 mm wide. It has holes that plastic anchors included in the set. It perfectly separates the lawn from pavement spilled with stone or the surface around sprinkled with bark, which will make the

# Garden border

Available colours: ● ● ● ●

Designed to separate flowerbeds, garden pathways and other surfaces poured with e.g. bark chippings, ornamental stones. It is a decorative element for every garden. Its major advantage is its elasticity, which allows for forming lines, curves or circles. The elements can be mutually connected, which makes it possible to create arrangements of any length. The height of the garden border is 116 mm, the width is 593 mm. It is made of polymer (PP material), thus it is very resistant to weather conditions. The fencing is easy to install, it should be just put into a pre-cut hole in the ground.
